GROUP OVERVIEW

streetprojects|group:

streetprojects|group has been formed to look after its two main brands;
streetproducts and **streetdoor|uk**.

Established in 1994 the family company started out supplying and installing security products mainly on commercial, industrial and retail properties. As the company grew its product portfolio grew, as did its customer base.

This led it to split into two brands: streetproducts and streetdoor|uk. This has enabled each area to specialise and focus on the products it is working with.

streetproducts specialises in external products such as a comprehensive range of cycle storage, canopies, covered walkways, fencing, gates, barriers and access control. It works with new build construction companies, councils, education, retail, development, leisure, transport, infrastructure and regeneration projects.

Product systems we provide are:

streetproducts: cycle storage and shelters

streetproducts: canopy and walkway systems

streetproducts: bin and buggy stores

streetproducts: perimeter products

streetproducts: street furniture

streetposts: a range of bollards and barriers

inox|uk: stainless steel street furniture, railings and gates

securitec|r: access control products

play: playground equipment

design|metal: special structures

streetdoor|uk specialises in property security and protection products and has a dedicated team supplying and installing: steel doors, industrial and roller doors, fire shutters, window security, access control and CCTV systems. It works mainly with local councils, education, commercial, leisure and construction.

Product systems we provide are:

SD Steel: steel doors and louvers

SD Industrial: industrial roller doors

SD Compact: aluminium roller shutters

SD Secure: steel security shutters

SD1000/1: insurance approved and non approved grilles

SD P Shield: window protection shields

securitec|r: access control products

streetprojects|group capabilities:

streetprojects|group has in-house manufacturing capabilities, with a dedicated team who have backgrounds in engineering, design and manufacturing.

DESIGN:

Our team can provide standard product adaptations to meet your specifications but can also design and manufacture bespoke products.

If a bespoke product is required we can offer full design and structural advice where necessary. The team can also offer drawings and consultation for planning permission, if required.

Our products are designed and produced using advanced CAD design & 3D software to ensure the products are manufactured to the highest standards and comply with CE and BS regulations.

PROJECT MANAGEMENT:

We offer a complete project service which includes project management. We will run the project in house to ensure the works are carried out smoothly, on time and to the quality standards expected from the client. We provide handover with training if necessary.

INSTALLATION SERVICES:

Our installation teams are constantly undergoing training to keep up with the latest Health & Safety requirements.

We are a CHAS accredited company and have recently been awarded the 'safecontractor' status. Our team are all CRB (criminal records bureau) checked, which enables us to work in schools and hospitals. All our onsite staff hold CSCS cards.

Within our installation packages we can offer:

- removal and disposal of existing products
- groundworks and clearing works
- cable running/ducting works
- rubbish and debris removal
- completion handover training, where required
- NIC electricians certification on electrical connections if required

Our teams can cover most of the UK for delivery and installations. Following the installation we can offer a full health & safety and preventative maintenance, annual servicing programme if required.

PRODUCT FINISHES:

All of our products are manufactured to meet BS Standards and are available in a range of finishes:

- stainless steel 304/316 – brushed, polished, bead blasted and many other finishes
- galvanised steel to BS EN ISO1461 (1999)
- polyester powder coating to standard RAL colours
- anodised aluminum finishes
- painted finishes using a spray process
- timber finishes using FSC timber – hardwood, pre treated softwood
- polyurethane products with steel core for maintenance free products
- recycled products from recycled plastic and rubber

We are a creative team and can mix and match product finishes to create the desired effect on any project.

streetprojects|group responsibilities:

Our company views our environmental, quality and health & safety issues seriously, and are dedicated to following an ongoing training program to keep up to date:

ENVIRONMENT:

streetprojects|group recognises that within the sector we work we have a number of responsibilities relating to the environment and to our surroundings. Therefore we have an environmental policy which applies to our potential customers and also our suppliers.

We approach sustainability in a serious way and we:

- ensure our supply chain does not use unethical labour
- use and design products that improve environmental performance

QUALITY:

streetprojects|group is dedicated to the quality control of its products and follows a strict procedure from order to handover

Quality for us includes:

- reaction to customer needs
- quality of product
- quality of service
- personal service
- aftercare
- detail
- value for money

HEALTH & SAFETY:

streetprojects|group is continuing a training programme to keep up to date with the latest health & safety standards. Below are the latest accreditations, and our health & safety consultants.

streetprojects|group is continuing a training program to keep up to date with the latest health & safety standards. We employ an independent health & safety advisor to audit our programmes and work, and to continue to advise us where necessary.
