

streetproducts overview:

streetproducts specialises in external products

Established in 1994 the family company started out supplying and installing security products mainly on commercial, industrial and retail properties. As the company grew its product portfolio grew, as did its customer base.

streetproducts specialises in external products such as a comprehensive range of cycle storage, canopies, covered walkways, fencing, gates, barriers and access control. The company works with construction, councils, education, retail, development, leisure, transport, infrastructure and regeneration projects.

mission statement:

"To provide creative solutions for external fittings for urban, street environments and within new development projects. To ensure our products meet the highest standards in design as well as quality and to offer that extra personal service and care you would expect from a family business."
